

Week 8 - Mini-Project Help

Reminder - the best place to learn MATLAB (or anything, really) is the internet! [StackOverflow](#) and MathWorks' own [MATLAB Exchange](#) are filled to the brim with people asking and answering questions about MATLAB. [MATLAB's own documentation](#) is also extensive and extremely helpful. It includes descriptions of how to call functions as well as usage examples.

[Return to Lectures](#)

This week of the class will be dedicated to helping with debugging or brainstorming solutions to the given problems.
